## Details of the facilities and innovations made

The Dr. Ulhas Patil Medical College & Hospital has created an ecosystem for innovation, research, and training to enhance research activities:

An incubation center supports research, innovation, and intellectual property rights through the Molecular Diagnostic Lab (MDL), Central Research Laboratory (CRL), Simulation Skill Lab, and Adverse Drug Reaction (ADR) monitoring center.

Plagiarism detection software is implemented, and all users are informed about it.

The Central Research Laboratory (CRL) provides facilities for undergraduate, postgraduate, and faculty research projects under one roof.

The CRL is well-equipped with various instruments and testing materials, with an updated inventory maintained.

The institute has conducted workshops on research methodology, good clinical practices, pharmacy collection practices, and analytical and statistical training.

Our institute offers healthcare services to the community, aiding in the clinical experience and skill development of undergraduate and postgraduate students.

We are a recognized ADR monitoring center (AMC) under the Pharmacovigilance Programme of India (PvPI).

Thus, the institution has established an ecosystem for innovation, including an incubation center and initiatives for knowledge creation and transfer.

A handwritten signature in blue ink, appearing to be "J. Patil".
