## BEST PRACTICES

### Title of the practice: Self-directed learning in the library

#### Objectives of the Practice:

Students need various skills and attitudes towards learning for successful independent study. This step involves students conducting a self-evaluation of their current situation, and study habits with independent learning in the library.

#### The practice:

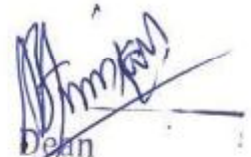

In order to maintain independent study a strong disciplinary action among students, the institute has made some changes in its policies. Accordingly, students must go to the library for study purposes between 9-12 pm. Attendance will be taken by one of the institution's representatives and if someone is found absent strong action would be taken. The message will be sent to their parents.

In addition to this, if anyone is absent, without prior information, or is absent in lectures, practicals or clinical postings strict actions will be taken for such misconduct and a direct message would be sent to their parents.

As part of this, a collective attendance report will be made every month. A regular warning will be given to the students who are unable to maintain their presence in lecture, practical or clinical posting. If the attendance of any student is found to be less than 75%, such student will be not allowed to appear in university exam.

#### Evidence of Success:

  
Dean

Dr. Ulhas Patil Medical College  
& Hospital, Jalgaon Kh.

It increases students' self-confidence, independence, motivation, and also the development of different skills for lifelong learning. It seems that the success rate of students increases each year after the implementation of this program. Moreover, many different educational institutes use it in order to promote independent learning.

**Problems Encountered and Resources Required:**

Not knowing what to learn. If you are new to a subject, it is often very challenging to decide what to begin learning, Self-motivation and interest, too much choice, and the easy way out. Despite its drawbacks, self-directed learning should not be written off. Instead, we need to think of better ways to apply the concept.

## Title of the practice: Blood Donation Camp

### Objectives of the Practice:

The Institute organizes the Blood Donation Camp for the Welfare of the society and motivates the Faculty, Students, and staff members to become responsible citizens and blood donors as well as spread the message of peace and harmony through humanitarian approaches. Blood donation is one of the most significant contributions that a person can make to society. It is not harmful to an adult person to donate blood. The body of the donor can regenerate the blood within a few days. It poses no threat to the metabolism of the body.

### The Context:

Blood donors save lives and more donors are desperately needed. A safe and reliable blood donor system offers important support for health services. A patient always has the right to assume that the donation of blood, testing and processing of blood as well as the production and distribution of blood products has been carried out professionally. We had granted a license to operate a Blood Bank for processing of whole human blood and /or preparation for sale or distribution of its components on 30/10/2019 with license no NKD/36 by License authority & joint commissioner (NASHIK DIVISION) Drugs, Food & Drug Administration M.S. Nashik.

### The practice:

We had organized blood donation camps at various places in the Jalgaon district like Godawari Engineer College, DUPMC Physiotherapy College, UCO Bank, Bank of Baroda, Big Bazaar, Jain Irrigation, and various Taluka of Jalgaon District. On average we had to collect 120 Units of blood on monthly basis from various locations. On average we are

Dr. Ulhas Patil  
& Hospital Jalgaon Kh.

organizing approx. 50 Blood Donation camps yearly. The blood donation camp received an overwhelming response from the faculty members, students, alumni, and other stakeholders, and the event was a grand success. We have a well-established infrastructure and manpower of blood bank as follows.

**Manpower:**

- |                          |                     |
|--------------------------|---------------------|
| 1. Three BTO             | 5. One Counsellor   |
| 2. One Senior technician | 6. Two Staff Nurse  |
| 3. Six Technicians       | 7. One clerk        |
| 4. One PRO               | 8. Three Attendants |

**Infrastructure:**

- |                                    |                                   |
|------------------------------------|-----------------------------------|
| 1. Component processing room       | 10. Counseling room               |
| 2. Component storage room          | 11. Sterilization room            |
| 3. Blood storage room              | 12. Quality control for component |
| 4. Collection room                 | 13. Changing room                 |
| 5. Staffroom                       | 14. Reception                     |
| 6. Bleeding room                   | 15. Waiting area                  |
| 7. Serology lab                    | 16. Staff toilet                  |
| 8. Medical examination room        | 17. Refreshment area              |
| 9. Separate male and female toilet | 18. Drinking water facility       |

All above the area was inspected by Deputy drugs controller (INDIA) CDSCO, West Zone Mumbai-08 on 12 April 2021 and approved by the Central Drugs Standard Control Organization Government of India.

Dated 01/01/2020 to 31/12/2024 we sent a request letter for renewal of blood bank license to License authority & joint commissioner (NASHIK DIVISION) Drugs, Food & Drug Administration M.S. Nashik and we got renewal with effect from 30/10/2019 to 31/10/2024 by Central Drugs Standard Control Organization Government of India and License authority & joint commissioner (NASHIK DIVISION) Drugs, Food & Drug Administration M.S. Nashik.

  
Dr. Ulhas Patil, Medical College  
& Hospital, Jalgaon Kh.

**Evidence of Success:**

The camp was very successful and appreciated by all the stakeholders including blood banks. Every year the percentage of participation in blood donation will increase and students are eager to donate blood. The blood banks never went with even a single empty pocket; it shows the success of the program. The students and various occasion's enthusiasm motivate the institution to organize many programs like this.

**Problems Encountered and Resources Required:**

We have faced a scarcity of Blood donors due to the pandemic and vaccination. In an effort to maintain the safety of donors and staff cannot be risked. Voluntary donors residing at a walk-away distance from the blood bank too might be apprehensive to turn up for donation. The blood collection sites and stations need to undergo thorough disinfection and disposal of medical waste needs to be handled more meticulously. The psychological impact of COVID-19 as a disease and the effects due to the nationwide lockdown on donors, acute or long-term, would also require attention. however, it is critical to educate people about the importance of donating blood.
