### List of opportunities provided for the students for midcourse improvement of performance in the examinations

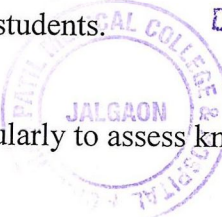

1. Term Internal Assessment Examinations
2. Preliminary examination for internal assessment
3. Tutorials
4. Special classes
5. Personal Attention by faculties for Slow Learners:
6. Make-Up Assignments
7. Revision Classes
8. Case Presentations in Clinical Postings
9. Mentorship Programme

College Provides opportunities for the improvement in academic performances of the students for them who shows fluctuating performance in the internal assessment exams and those with long absenteeism due to medical reason.

1. Term Internal assessment examinations – Total 2 term internal examination which are 1<sup>st</sup> term, 2<sup>nd</sup> term, done on semester basis.
2. Preliminary examination for internal assessment – one preliminary examination is taken before university examination. The pattern of this examination is same as that of University examination which act as a mock test for students.
3. Tutorials – Tutorials are conducted regularly to assess knowledge of student time to time.

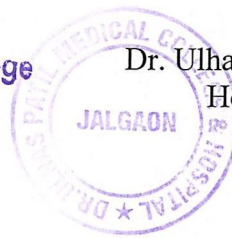

Dean

Dr. Ulhas Patil Medical College  
& Hospital, Jalgaon Kh.

4. Special classes –Special classes of the students who are lagging behind are taken to improve their performance.
5. Personal Attention by faculties for Slow Learners: A faculty In-charge is appointed to slow learners for training in each internal assessment exam.
6. Make-Up Assignments - Before the internal assessment, make-up assignments are given to the slow learners on topics in assessment which is time bound. This is not publicized and the information is personally communicated to the students.
7. Revision Classes - Revision classes are being regularly conducted by all the departments prior to the examinations, after the completion of syllabus, with the purpose of reinforcement of concepts and with the intention of providing a supporting hand to the slow learners.
8. Case Presentations in Clinical Postings –Periodic case presentation are carried out to provide opportunity for direct feedback and improvement.
9. Mentorship Programme - In addition to the above mentioned activities, a mentor-mentee programme is active in college which periodical assessment of the student and creates an opportunity to provide feedback to the students.

Measures to take for slow and fast learners:

### **SLOW LEARNERS**

To help such individuals, certain distinctive measures must be devised and that blueprint must be implemented with immediate effect, Measures like:

#### **Extra Classes:**

“Practice makes a man perfect”, a popular saying and yet neglected by many. We in DUPMC have managed to extract remarkable yields out of it. Special extra classes have been arranged for students who due to some reason take more time to learn which has to a great extent helped them to overcome their shortcomings.

#### **Mock Tests:**

It works just like a vaccine. The more students are exposed to exams, the more easier it becomes for them to perform well in them. Repeated exposures to such mock tests have proven to be quite helpful for students to get a grip of concepts.

#### **Seminar Presentations:**

This may sound like something tailor made for the fast learners only, but if we keep on pampering the short comings of the slow learners, it is not going to help them and it is not going to help the institute. Hence, we have thoroughly encouraged all students to present topics for their better understanding which only adds to the longevity of their memory.

#### **Counselling:**

Perhaps the paramount measure to be considered. Words have a great impact when used tactfully. We have always directed our teachers and mentors to keep on pushing forward and encouraging students to do better and better in their academics and that if they have an iron will and steely determination, they can make wonders happen. This has proven to be the pivot around which all the other remedies have evolved.

## **Meditation and Yoga**

Peace of mind may be a very remote thing for many students pursuing Medicine, but we Godavarians are spiritually strong and that proves to be an ace up our sleeve every time we compete in the contemporary world.

## **FAST LEARNERS:**

Every diamond needs to be precisely cut to enhance its looks and add to its glitter. Certain tried and tested measures have been implemented for our students:

### **Quiz:**

The more students are exposed to question and answers, the more easily they can cope up well, which only proves beneficial for the students to level up their skills in the light of competitive exams. Many of our students due to this initiative of ours have been able to shine in State and National level quiz competitions.

### **Rapid Fire Tests:**

When competing in the world we live in today, one needs to be really quick in their approach towards questions. Thus, to have concepts and facts at their fingertips and to make them able to remember these concepts quickly, we have in our college embarked on a rapid fire spree.

### **Paper & Poster Presentation:**

A thorough pre exposure to paper and poster presentation has helped our students even in their post-graduation courses. The “element of anxiety“ is thus very easily eliminated. This has also proven to be helpful in average students to build up their confidence.

### **Debate:**

We have come to a conclusion in the past 5-6 years that a friendly yet fierce and feisty debate can do wonders in giving fast learners a polish of excellence. Not only does it help in boosting up their morale but also in making great orators out of them.
