**T**he Author of this book, Dr. Amrut Mahajan is a popular teacher in Anatomy. He passed his post graduation in Anatomy in the year 1987 from Dr. B. A. Marathwada University Aurangabad. He worked as Asst. Professor, Associate Professor and Professor in medical college Aurangabad, Bopal, Mumbai & Latur since 1987. Presently he is working as a Professor and HOD in Anatomy at Dr. Ullhas Patil Medical college Jalgaon. He is interested in teaching to UG & PG student in precise and accurate manner with emphasis on simple diagram. This book contains General Anatomy, Embryology, Histology and Genetics which will help students to express in examination and understanding the subject in easy way.

OP-69**The Indian Academy of Cytologists Guidelines for Reporting Serous Effusion (IACGRSE) - An Interobserver Agreement Analysis**

Vaishali B Nagose, Meherbano M Kamal, Surbhi Kathuria,  
Shraddha A Laddhad, D T Kumbhalkar Department of Pathology,  
GMC Nagpur

**Introduction:** Guidelines and categories for Reporting serous effusions (GRSE) have been published by the Indian Academy of Cytologists (IAC) in 2020 (IACGRSE). This study was conducted to evaluate category-wise agreement while using IACGRSE and interobserver variability amongst observers with different level of training and years of experience, as there are no such studies in serous effusion cytology yet. **Material and Methods:** This is a retrospective interobserver variability study carried out at Cytology unit, department of Pathology, GMC, Nagpur. A total of four cytopathologists - one expert (34 years experience) and three cytopathology fellows (A - eight years experience, B & C - one year each) studied 60 Cases of serous effusion smears and assigned their observations in the categories of the IACGRSE (I- Unsatisfactory, II-No Malignant cells/ Benign, III-Atypical cells, NOS, IV -Atypical cells -Suspicious of Malignancy, V-Malignant). Agreement analysis was done. **Results:** 88.3% interpretations of A were in agreement with the expert cytopathologist's, whereas the same for B & C were 55.0% and 46.7%; with kappa scores for variability with experience being 0.7249 (good agreement), 0.0875 and 0.1692 (poor agreement) respectively. When overall intercategory variability matched with expert was studied, Category II showed maximum agreement (Kappa 0.4259) followed by Category V (Kappa 0.3729). Intercategory variability matched with expert in Participant A was showing best agreement in category I (kappa - 1) followed by Category V (kappa - 0.7825) and II (kappa - 0.7321). **Result:** The IACGRSE are showing good agreement in malignant category (V) although people with higher experience
